Weekly Status Report:

Week of: 5/20/2019 to 5/26/2019

Report prepared by: Hiren Rathod

We had three major activities planned for this week. We aimed to split up our convenience store into different departments in order to efficiently complete our database file. However, we were not able to proceed with updating the database file because every department was not chosen. Yue Pan was able to get a phone number and he is now integrated across all group communication platforms. We expect to have a complete and functional database file in the following week. We will also discuss coding strategies and necessary action items for this project.
